## ...and percent.

By hovering over either the green or red region of the charts, a pop-up will display the count or percent.

In the trend section of the summary page, hovering over sections of the graphs will also bring up a pop-up with details on the region the mouse cursor is closest to.

Note that by clicking on the key entry you can also toggle the display of that key element. Below we click on the "NHQ Classes" key entry to hide the NHQ classes and only display the HQ classes. Clicking the key again will toggle the display on.
